

NOTICE

June 10, 2009

Dear Resident:

The City of Bloomfield Hills in coordination with the City of Birmingham and the Southeastern Oakland County Water Authority (SOCWA) are pleased to announce the commencement of the **2009 Bloomfield Hills Water System Improvement Program**, which has been awarded to Pamar Enterprises, Inc. Construction is scheduled to begin the week of June 15th and is expected to last until August 15th, 2009.

This project will consist of the construction of an underground water metering and pressure reducing vault on the southwest corner of Quarton Road and Chesterfield Road and a 12-inch water main along the north side of Quarton Road from Chesterfield Road to Cranbrook Road. Temporary shoulder closures will be frequent during the duration of this construction, while one lane closures will be limited and will only occur between 9:00 am and 3:00 pm. The primary construction method to install the water main along the north side of Quarton Road will utilize horizontal directional drilling to limit the amount of tree and vegetation removal necessary to construct this project. All work that is to be done will be completed within the Quarton Road and Cabot Place rights of way.

The Cities of Bloomfield Hills and Birmingham are planning on providing notices to update the status and progress of the project to all residents adjacent to the project. The Cities are requesting that any resident that would like to be informed about updates and status of the project via e-mail, should contact Hubbell, Roth & Clark, Inc. listed below to be included on an e-mail distribution list. Should you have any concerns or questions, please contact.
