Re: City garbage collection

To Whom It May Concern:

I am the transportation manager for the Bloomfield Hills School District.

It has come to my attention that the city is considering hiring one hauler to collect trash one day per week instead of the five days it currently does.

This would be extremely beneficial as our buses are constantly having to weave in and out between the garbage trucks. The safety of our drivers and children is our primary concern and having this situation one day per week rather than five would be very helpful and much safer for everyone.

Thank you very much for your consideration in this matter.

Sincerely,

Diane Holden  
Transportation Manager
