Susan McCarthy
Mayor

June 21, 2019

William E. Hosler
Mayor Pro Tem

Dear Resident:

Michael Coakley
Commissioner

The 2019-2020 Water Main Replacement and Road Construction for the City of Bloomfield Hills has begun for this construction season.

Sarah H. McClure
Commissioner

Decorative Driveway: The driveway will be removed approximately 3'-5' from the proposed edge of shoulder. After construction, a stone base will be laid where the decorative driveway was removed. It is the property owner's responsibility to schedule the replacement of the decorative driveway material after the road is paved and the restoration work is completed.

Stuart D. Sherr
Commissioner

David Hendrickson
City Manager

Boulders: The Contractor will move the existing boulders located in the City's road right of way and place the boulders onto your property, outside of the right of way. Upon completion of construction and in keeping with the City's ordinance regarding right of way management, it is the homeowner's responsibility to re-install the boulders no closer than 3 ft. from the traveled portion of the road.

Trees: Trees located in the right of way or tree branches hanging into the right of way may need to be trimmed by the contractor to allow for installation of underground utilities. The City is committed to saving and protecting trees to the best of our ability while replacing infrastructure in the right of way. Damage to trees or to a root system that is in the City right of way as a result of construction will not be the responsibility of the City during the restoration phase of the project.

Landscaping: Landscaping in the right of way may be disturbed by the contractor to allow for installation of the underground utilities. As each circumstance is different, the Project Engineer, Lia Michaels will communicate with each property owner the extent of the landscape disruption required to complete the infrastructure work.

Irrigation: Is it recommended to turn off your irrigation zones that run along the roadway. If the Contractor hits or damages the irrigation system, they will make repairs during the restoration stage of the project.

Mailboxes: The contractor will install temporary mailboxes to maintain mail delivery during construction. You will receive detailed information prior to this occurring. The existing mailbox in front of your property will remain during construction until it is time to re-install toward the end of construction to meet the current USPS standards.

If you would like to have a meeting to discuss the work listed above, please contact Lia Michaels with Hubbell, Roth & Clark at lmichaels@hrcengr.com, or (248) 454-6812 to schedule an appointment.

The City creates a confidential email system for each project for residents to be updated regularly on the project statuses. If you would like to be added to the email list, please contact Amy Burton, Bloomfield Hills

City of Bloomfield Hills
