TYPE OF CONSTRUCTION _____ INTERIOR ALTERATIONS _____	NUMBER OF INSPECTIONS _____		
SQUARE FEET _____			
APPROVAL SIGNATURE _____			
BUILDING OFFICIAL _____		DATE _____	

Part IX- MUEC compliance Statement

In addition to the mandatory requirements, the energy code requires you to choose one of the three alternative compliance paths to demonstrate code compliance. Indicate the path you choose below by **checking one of the following boxes and completing the instructions.**

- Prescriptive (as prescribed by the code)

If you choose to use the prescriptive method of compliance, you may demonstrate compliance by completing the attached Prescriptive Compliance Report Form. **Sign the compliance statement below.**

- Total UA Alternative (trade-off method)

Compliance with the Total UA Alternative method may be demonstrated by completing a compliance report using Rescheck software provided free of charge at energycodes.gov. **Sign the compliance statement below and attach a copy of the completed compliance report with this form when submitting for a building permit.**

Please note that the building plans shall show the same materials and methods you use to complete the REScheck form. For example, if you use basement wall insulation in REScheck , such insulation should be clearly indicated on the building plans as well.

- Simulated Performance Alternative (performance analysis)

Certain commercially available compliance software (e.g. REM/RATE ,etc.) may be used to demonstrate that the proposed construction will have an annual energy cost that is less than or equal to the energy cost of the standard reference design. Please see Section 405 of the code for specific criteria. Such software shall generate a compliance report that documents that the proposed design complies and shall include information outlined in Section 405.4.2. **Sign the compliance statement below and attach a copy of the completed compliance report with this form when submitting for a building permit.**

Compliance Statement

I have read and completed the Energy Code Compliance Worksheet and will insure that the actual construction of this project complies with the Michigan Energy Code as adopted.

Prescriptive Compliance Report Form

(Please note that this form is only required if you have chosen the prescriptive compliance path.)

In the table below, indicate the proposed values of insulation, fenestration and other components in your proposed home. Please note that such components shall meet or exceed the performance of the prescribed values. If you have any clarifications, please note them in the comment section. Finally, the building plans shall show the same materials and methods you use to complete this form.

Component Description	Prescribed Value	Proposed Value	Comment
Fenestration U-Factor	0.35		
Skylight U- Factor (a)	0.60		
Ceiling R-Value	38		
Wood Frame R Value	20 or 13+5 (b)		
Mass Wall R-Value ©	13/17		
Floor R-Value	30 (d)		
Basement Wall R-Value (e)	10/13		
Slab R-Value & Depth (f)	10,2 feet		
Crawl space Wall R-Value	10/13		
Attic supply ducts R-Value	8		
Other supply ducts R-Value	6		
High efficacy lamps in permanently installed light fixtures-percentage	50%		
Attic access doors Doors shall be weather-stripped and insulated to level of ceiling insulation. A wood frame or equivalent retainer is required around the access when loose fill insulation is used.			

- (a) The fenestration U-factor excludes skylights
- (b) 13+5 means R-13 cavity insulation plus R-5 insulated sheathing. If structural covers 25% or less of the exterior, R-5 sheathing is not required where structural sheathing is used. If structural sheathing covers more than 25% of exterior, structural sheathing shall be supplemented with insulated sheathing of at least R-2.
- (c) The second R-value applies when more than half the insulation is on the interior.
- (d) Or insulation sufficient to fill the framing cavity, R-19 minimum.
- (e) The first R-value applies to continuous insulation, the second to framing cavity insulation, either insulation meets the requirement.
- (f) R-5 shall be added to the required slab edge R-values for heated slabs.

This form is intended to provide a simple means to document prescriptive code compliance. Please see the full code context for exceptions, alternatives and other requirements that apply.
