

July 22, 2019

Dear Residents:

As you are aware, infrastructure work has begun on the 2019 Chesterfield / Lakewood project. The contractor started working on the water main installation, beginning near Woodward Avenue working down Chesterfield Road.

Tuesday, July 23rd, Cadillac Asphalt crews will be pulverizing the road and the water main installation work will continue on Chesterfield.

The contractor will maintain eastbound traffic to the best of their ability during the construction. However, there may be times that will require the road to be closed for the work to be completed safely and efficiently. If a road closure is planned, we will do our best to communicate via the e-news blast and with information posted on our website.

Residents interested in receiving the road program e-newsletters, please send an email to City Clerk Amy Burton at aburton@bloomfieldhillsmi.net with your name, address and email address to be included in the City's confidential e-news database.

The 2019 -2020 Road & Infrastructure Improvement link on the City's website at www.bloomfieldhillsmi.net also has current information on the planned project.

Should you have questions regarding the projects, please contact the Project Engineer Lia Michaels at (586) 634 - 6211.
