

July 26, 2019

Residents:

Some streets under construction have been experiencing delays in garbage pickup. We have been working with the garbage hauler to help avoid further difficulties. Please contact the onsite Field Representative should you have any concerns to report.

Survey and staking crews are still in the area marking various infrastructure locations. These stakes must remain in place until removed by the contractor for a safe and efficient installation process.

While the construction is a disruption to your daily schedules, we ask for your cooperation to maintain safety for both the construction crews and for residents. To the extent possible, please consider limiting trips in and out of the construction zone and refrain from parking in the heavy construction areas. Please do not use neighboring properties to park or as a bypass of the construction. The crews and the onsite field representative will do their best to help you with site access. Please understand this is a very active construction zone which can be dangerous in itself. We have recently experienced instances where high speeds and ignoring road closures have put both residents and workers in danger. Your patience and consideration will only help to improve the safety of the site for everyone.
